DETAILED ACTION

1. The preliminary amendment filed March 19, 2004 has been received and entered.
2. Claims 1-6 have been cancelled.
3. Claims 7-18 have been added.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 7, 9, 11, 13, 15, and 17, drawn to a method of treating diabetes, classified in class 424, subclass 776.
 - II. Claims 8, 10, 12, 14, 16, and 18, drawn to a method for treating obesity, classified in class 424, subclass 776.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The function of invention I is to treat diabetes. The function of invention II is to treat obesity. These methods do not necessarily treat the same patient. Thus, the functions are distinct.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1655

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
